Welspun Corp. Ltd. is moving ahead quickly with planning and site selection for its new electric-resistance welded (ERW) pipe mill in the United States, according to a top company official.

Welspun Corp. Ltd. is moving ahead quickly with planning and site selection for its new electric-resistance welded (ERW) pipe mill in the United States, according to a top company official. "We're going to try to fast-track the project, get it going as quickly as possible and make the (site) selection as soon as possible," David Delie, president of U.S. subsidiary Welspun Tubular LLC, told...
